

The AirTamer Lineup

AirTamer A302

- 140+ hour run time
- Powered by 2 included CR-2025 replaceable batteries
- Breakaway conductive lanyard with length adjustment and safety clasp
- Pocket clip
- ON indicator
- Includes travel case

AirTamer A310

- 150+ hour run time
- Rechargeable - no need to replace batteries
- Breakaway conductive lanyard with length adjustment and safety clasp
- ON and charging indicator
- Includes USB charging cable
- Available in black or white
- Includes travel case

AirTamer A315

- 50+ hour run time
- 31% smaller than A310
- Rechargeable - no need to replace batteries
- Replaceable conductive lanyard and ion emitter cover
- Breakaway conductive lanyard with length adjustment and safety clasp
- Pocket clip
- ON and battery charge indicator
- Includes USB charging cable
- Available in black or white
- Includes travel case

AirTamer A320

- 150+ hour run time
- Rechargeable - no need to replace batteries
- Replaceable conductive lanyard and ion emitter
- Breakaway conductive lanyard with length adjustment and safety clasp
- Pocket clip
- ON and charge indicator
- Includes USB charging cable
- Available in black or white
- Includes travel case

Customers Love Their AirTamer!

Improved breathing within seconds of use.

S. McMillin

I do not catch colds on airplanes anymore.

L. Loh

My family are loyal customers of your products. My father was diagnosed with stage 4 lung cancer early this year and is very impressed with how AirTamer works. My wife, who is a Pulmonologist doctor, is now recommending AirTamer to her patients.

J. Lim

I received a life-saving double lung transplant in 2014 due to pulmonary fibrosis. After my transplant, I had to become more conscious of my health and reducing my exposure to airborne particles. AirTamer was first introduced to me in 2017, after which I immediately purchased one. I have been a thoroughly satisfied customer and frequently recommend AirTamer to others. I travel regularly and the device helps me to breathe easier on planes and in other large, crowded areas. It has allowed me the freedom to continue my life to the fullest and removed some of the worry associated with protecting my new lungs.

L. Chandler

Your product saved our life. I am a physician and can see the evidence. My 7 year old son suffers from severe allergies especially with severe pollution. AirTamer has reduced the number of allergy attacks and the need for medicine.

D. Zhang

Keeps me well.

L. Brittain

AirTamer® Personal Air Purifiers

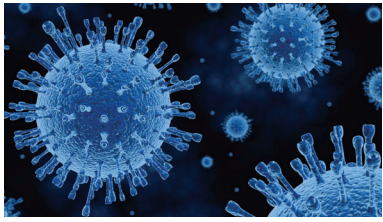

*Breathe cleaner air
– everywhere you go!*

**POWER BOOST
TECHNOLOGY™**

**VIRUS
REDUCTION
TECHNOLOGY**

TRUSTED, SUPERIOR CLEANING POWER

Clean Air Is More Important Than Ever!

AirTamer is the world's most effective, best-selling personal air purifier. Tested in internationally

recognized, independent laboratories to verify its effectiveness, you can count on AirTamer® to help protect your breathing space from airborne pollutants that can make you sick. Trusted by healthcare workers, heads of states, celebrities, teachers, young and old in over 55 countries around the world.

Smallest Particles do the Most Damage to Your Health

Traditional HEPA type air purifiers typically filter out particles 0.3 microns in size and larger. However, 97% of particles in the air, particularly the more dangerous particles like viruses, are smaller than 0.3 microns

and pose the biggest threat to your health because they can more easily reach your lungs.

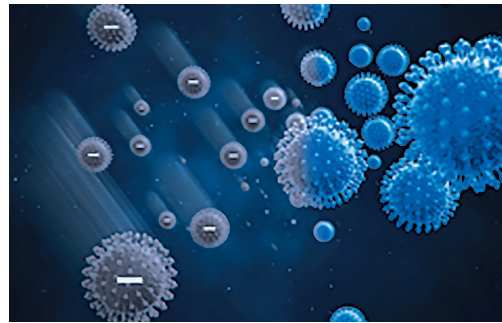

How AirTamer Works

AirTamer® emits millions of negative ions every second from the little black brush at the top of AirTamer.

These negative ions attach themselves to particles in the air like viruses, allergens, pollution, etc. and negatively charge those particles.

AirTamer Removing Smoke

Those negatively charged particles will then be naturally attracted to positively charged surfaces around you (e.g. a table, chair, window, clothes, etc.), rather than continuing their way towards your breathing passage where they can make you sick. As a result, AirTamer® reduces the probability that you will inhale these bad particles and become ill.

Breathe cleaner air – everywhere you go!

Laboratory Certified Performance

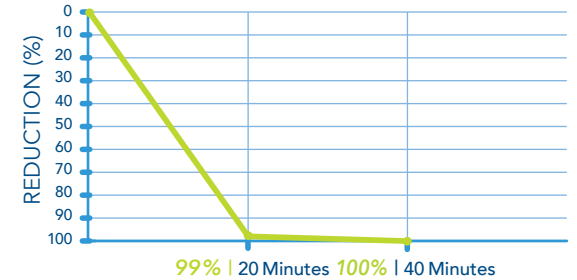

AirTamer is tested by independent, internationally recognized laboratories to certify our superior performance, safety and industry leading health standards.

Virus Testing

Independent testing at the prestigious Kitasato Research Center in Japan confirmed that AirTamer removes 99% of viruses from the air within 20 minutes.

Airtamer Is Proven To Eliminate 99% of Viruses* in 20 Minutes

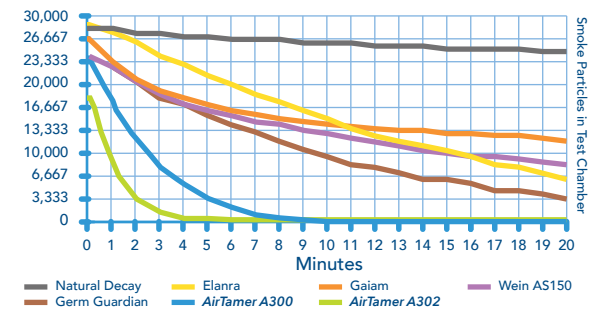

*Virus reduction testing by Kitasato Research Center using Escherichia coli phage MS2 NBRC 102619 and Influenza A viruses.

Smoke Testing

Independent testing at the internationally recognized Intertek Laboratory in Cortland, New York confirmed that AirTamer reduced smoke by 98.9% within 5 minutes.

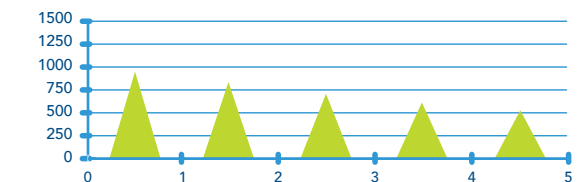

98.9% Smoke Reduction Rate over 20 Minutes
